

**Preliminary Selected Plan**  
**Water Preserve Area Feasibility Study**  
8/21/00

<b>Component</b>	<b>Preliminary Selected Plan</b>	<b>Comments</b>
Hillsboro Impoundment	Alt 3	Revise ASR operations; meet LEC demands for C-14, C-13, C-12; & investigate maximizing WRA to supply WCA 2A.
WCA 3A/3B Seepage Mgmt	Alt 3	Achieve Alt 3 intended performance
C-11 Impoundment	Alt 1	Move mitigation to North/Northwest corner; improve seepage mgmt on east side without negatively impacting mitigation outside impoundment.
C-9 Impoundment	Alt 1	Increase ASR if needed; include chimney and DOT mit; identify and include additional water supply demands.
Dade Broward Levee Conveyance	Alt 3	Provide additional flows to Northwestern Pennsuco
C-4 Structure	D13R	No change
Bird Drive Recharge Area	Alt 3	Modify footprint to avoid urban development boundary and West Wellfield.
Strazulla Wetlands	Alt 3	Determine best method to control seepage on Northern boarder.
Acme Basin B	Alt 3	Add pretreatment and STA; route water to C-51 for more flexibility.
Ag Reserve Reservoir	Alt 2	Keep meander canal; determine if can meet demands without land swap; determine if cost-effective to relocate, flood proof or avoid FPL lines.
Lake Belt Storage Area	Alt 1	Use all WRA's.
